

STAKEHOLDERS' INFORMATION

Updated 2006.10.30

In this "Stakeholders' Info" section, we will show summary financial statements and operational results. We try to illustrate the actual business activities behind it and the accounting policies so that stakeholders can better understand the businesses not fully expressed in accounting statements.

We would like to give our stakeholders the financial and operational information and commentary we would wish to receive if our roles were reversed and we try to design this section to serve the purpose.

We call this section "Stakeholders' Info.". This means that the section (and for that matter, the whole Website) is meant to serve all the people who have interest and relation to Trinity.

【The first Stakeholders' Information and Comments are scheduled to be uploaded after the fiscal year end (December 31), around January 2007.】
